

Memo from
JOSHUA LEDERBERG

To: Sid

DYNAMITE!

This is not to be confused with
a Schwartz initiative. and it
is only incidentally related to
SASOW.

But I can foresee another CAMEROT
disaster with a serious impact on
research in human genetics if the
nature of ARPA's interest and
role in such studies cannot be
clarified and ventilated. (My assump-
tion is that it has no remotest con-
nection with "ethnic weapons" —
I hope so!) Can you help me find
out — in releasable form — what
"ARPA order 580" is all about? yours

Josh
